You're holding in your hands a Premium All Natural and Organic Plant Food . . .

We know this because we produce it. We're Master Nursery Garden Centers, a group of over 750 independent garden centers across the country, each dedicated to helping gardeners in our hometowns have Great Gardens.

Master Nursery began in the 1950's when a group of nurseries in the San Francisco Area joined together to get group buying power while remaining independent businesses. Soon they decided to produce their own products which would be "The Best Products for Home Gardeners" and that is still our credo. We use only the finest ingredients and monitor every step of production so we can give you our Unconditional Guarantee. If you are not 100% happy with this product, bring it back to the garden center where you bought it. That garden center is one of our members, but even more importantly, they are a locally owned business and a member of your community. So buy and use this product with confidence, knowing it is . . .

good for your plants and good for your community.

Product Benefits

Our Bumper Crop Natural & Organic Rose & Flower Food is a blend of natural ingredients designed to encourage sturdy growth and flowering in roses, perennials and other flowering plants and acceptable for use in organic production.

Directions for Use

For optimum results water the area thoroughly and allow the plants to absorb the water prior to fertilizing. After applying Bumper Crop Natural & Organic Rose & Flower Food, work the fertilizer gently into the soil surface and water. For best results be sure the fertilizer is in direct contact with the soil. Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn/garden, and sweep any product that lands on the driveway, sidewalk, or street, back onto your lawn/garden.

PLANTS TO BE FERTILIZED	WHEN AND HOW OFTEN TO APPLY	HOW MUCH TO APPLY	HOW TO USE THIS PRODUCT
Established Roses and Flowering Shrubs	Every 2 months throughout the growing season.	1 cup per 10 sq. ft., or 2 cups per inch of trunk diameter, measured 4" - 6" above soil line.	Gently mix into soil and water well.
Container Plantings	Every 2 months throughout growing season.	1 tablespoon per each quart of potting medium.	Gently mix into soil and water well.
Planting New Roses and Flowering Shrubs	Prior to planting transplants	1/4 cup per 1 gallon plant in planting hole.	Gently mix into soil and water well.
